Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Rejection Withdrawn

1. Claims 94-105 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell for reasons of record in paper no. 11, paragraph-3, mailed on august 26, 2003.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 94-110 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell.

Campbell relates to a multi-layer article comprising an article having a first surface of at least partially cured first adherent and a second opposite surface of having at least partially cured second adherent (abstract and col. 3, lines 9-12). The multi-layer article has a surface flatness and a transmission flatness of about 0.05 to about 0.25 waves/cm at wavelengths of about 0.4 to 0.7 microns (col. 6, lines 28-32). The article can be 0.5 or greater (col. 6, lines 51-53). The adherent is disposed between the article and a substrate (col. 6, lines 54-57) which can be made from glass, polycarbonate, etc. material (col. 11, lines 31-43). The substrate can have at least one hole as shown in

figure-4B. The substrate can have any shape, particularly circular and have a thickness of 0.1 to 1.0 mm. In col. 12, lines 60-64, Campbell teaches that the article is typically "significantly free" of from divots and peaks, which would infer to the presence of some relief pattern or diffraction grating roughness.

The intended use phrases such as "for dispensing", etc. have not been given patentable weight because said phrase is not deemed to be a positive limitation.

Conclusion

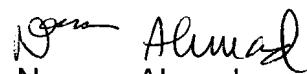

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
